High Performance Hydraulics

The Aquatec range of high performance hydraulics has been developed over many years to meet the arduous demands of both surface and subsea marine environments.

Aquatec products can be manufactured entirely from a variety of stainless steel grades or from suitably corrosion protected carbon steels or aluminium alloys.

Designed for long life and ease of maintenance the Aquatec range of products includes:

Double Acting Hydraulic Cylinders

~

Semi Rotary Actuators

~

Oil/Oil or Oil/Water Intensifiers

~

Fail-Safe Cylinders

~

Depth Compensator's

~

Subsea Valve Cabinets

~

Single & Multi-Way Hot Stabs & Receptacles

~

Motor Pump Sets
